## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 35-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shin et al (2003/0132466) in view of Matshuhashi (JP 05226361) and Stolk (WO 00/77828) cited on the IDS filed on 1-12-06. The Shin and Matshuhashi references teach the basic inventive concept of forming a gate electrode with different work function portions across the gate electrode, whereby, for NFET devices the outer portions of the gate electrode will have a lower work function than the central gate portion, with the opposite relationship used for PFET devices.

The reference to Stolk appears to show the newly added claimed feature wherein the combination gate is formed in a trench, and where the gate dielectric extends along the bottom of the trench as well as up the sidewalls of the trench. See, for example the device shown in FIG. 10 of Stolk. Stolk also uses gate electrode portions with different work functions, and his disclosure of a gate dielectric lining the trench would be applicable to and particular work function arrangement.

Taken together, these references appear to teach all of the claimed features, and one skilled in the art would be motivated to combine these references in order to achieve superior device characteristics.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Parker can be reached on (571) 272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
